DEEP BED SAND FILTERS

THE NATURAL SOLUTION FOR SPARKLING CLEAR WATER IN YOUR HOUSE OR BUSINESS

**PROVIDES FILTERED WATER AT EVERY TAP
WITHOUT THE NEED FOR REPLACEMENT CARTRIDGES**

EcoPure™ DEEP BED SAND FILTERS

THE NATURAL SOLUTION FOR SPARKLING CLEAR WATER IN YOUR HOUSE OR BUSINESS

Application

EcoPure™ Deep Bed Sand Filters have been designed for installation after the incoming mains water supply. As water flows through the deep bed of granular filter media, rust, sand, dirt particles and other solids are trapped by the filter bed allowing pristine, clean filtered water to flow throughout the entire household or business.

EcoPure™ Deep Bed Sand Filters are supplied standard with a high quality oil filled pressure gauge to indicate when it is necessary to clean the filter media. The filter is very easy to maintain. To clean, simply turn the multiport valve handle to "Backwash". This procedure reverses the flow of water through the filter, flushing the filter media of the trapped contaminants.

EcoPure™ Deep Bed Sand Filters are suitable for use with **ZeoPure™** mineral filtration media. ZeoPure™ provides many additional benefits to standard Silica sand including filtration below 10 microns, ammonia absorption, softer water and reduced rust formation in pipes - see the separate ZeoPure™ brochure for further information. In addition, the EcoPure™ Deep Bed Sand Filters can be used with other media such as Activated Carbon (for removal of odour) Organic Compound Soft Resin (softening and filtering minerals) Clean Water Resin (for filtering organic compounds, colour, fluoride and algae) and Nitrate Selectable Resin (fish ponds).

Benefits

- Cleaner and brighter laundry
- Reduced frequency of filter tank cleaning in situations where a storage tank is used
- Filtered water for cleaning, cooking and washing
- Reduced scratching and abrasion of sanitary ware and piping systems
- Longer life of Hot Water Systems, Washing Machines, Electric Kettles and other Appliances
- No need to remove or clean filter cartridges as compared with high maintenance cartridge filters

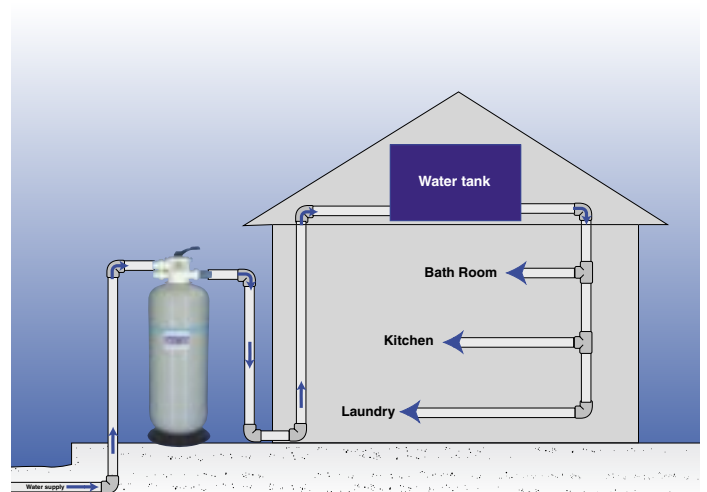

Features

- High density filament wound filter design for ultra long life
- Multiport Valve with Palm Handle for ease of use
- Quality Oil filled Pressure gauge
- Slim design for easy installation and economical backwash
- Deep bed design for better filtration than standard Sand Filters
- Simple operation

Technical Information

Model	D16	D20	D24	D28
Filter Area m ²	0.13	0.2	0.28	0.38
Height (mm) assembled	1300	1300	1300	1300
Tank Dia. (mm)	400	500	600	700
Design Flow (lpm)	70	113	165	226
